Bug Fixes

Description	ERP Specific
In an effort to align more closely with NetSuite, MineralTree now supports the posting of invoices with backdated Amortization Schedules. When saving an invoice with a backdated Amortization Schedule, users will receive a warning message they can then confirm to save and post.	NetSuite
Fixed a bug that was marking invoices deleted in Intacct as "Paid" within MineralTree.	Intacct
Fixed an issue that was preventing saving Allocation Templates with decimal point percentages.	N/A

Connector Updates

Connector	Update Required
QuickBooks Desktop	No
Microsoft Dynamics Great Plains	No
Sage 100	No
Microsoft Dynamics Business Central	No
