

v20.4.0
April 16, 2024

New Features & Enhancements

Description	ERP Specific
Previously, modifications to a vendor's int'l payment details did not trigger the standard alert to AM users. Following this change, applicable users will be notified if Int'l details are modified.	N/A

Bug Fixes

Description	ERP Specific
MineralTree now automatically disconnects from Intacct during the Active Sync cycle if the user credentials have been updated in Intacct. This will resolve a longstanding issue of users being locked out of their Intacct accounts due to MineralTree not disconnecting when the credentials changed.	Intacct
Updated Intacct sync logic to ensure that invoices created or modified in MineralTree sync to Intacct as expected.	Intacct
QuickBooks Online customers now have more detailed error messages when reviewing their bills in MineralTree for their bills that were deleted directly in the ERP.	QuickBooks Online

v20.4.0
