

v23.3.0
September 16, 2025

New Features & Enhancements

Description	ERP Specific
We are excited to kick off our Dociphi pilot with a limited customer group this month! Our Dociphi solution will expedite our capture process significantly, going from a 24 hour turnaround to 90 minutes or less, all while retaining the same level of quality. Following our initial pilot, we will slowly begin expanding this offering to other customers. Stay tuned!	N/A
To enhance the user experience in the Invoice Details New View, we've added the ability to see IA users' email address when adding the approver to an invoice, as well as when viewing IAs currently included on the invoice.	N/A

Bug Fixes

Description	ERP Specific
Resolved an issue that generated an error message when copy/pasting certain birthdate formats on the vendor details page.	N/A
FBC I2P currently only has vendor based IA rules. Given that it supports other dimensions, it would help to allow customers to make IA rules based on the other dimensions like	N/A

v23.3.0
September 16, 2025

Description	ERP Specific
Department, Location, Account, Class and Vendor they might use.	
Resolved an issue with the customer data sync cycle by restricting the project data syncing, so that only customer data will sync during the customer sync cycle. In addition, the NullPointerException cases have been resolved w.r.t. the customer sync cycle.	NS
