

v23.5.0
November 11, 2025

New Features & Enhancements

Description	ERP Specific
By default, Dashboard 2.0 will be displayed upon logging into MineralTree. The toggle to reach the legacy dashboard page will still be available for users that wish to use the original view.	N/A

Bug Fixes

Description	ERP Specific
NetSuite connector had a limitation to sync only 1000 records for customer dimension during the initial sync process . This is now fixed to sync all incoming data records.	NS
Updated the payment details history log to reflect the actual account used at the time of payment submission, instead of the current account that is set up.	N/A

Connector Updates

Connector	Update Required
QuickBooks Desktop	No
Microsoft Dynamics Great Plains	No
Sage 100	No
Microsoft Dynamics Business Central	No

Cloud connectors (Intacct, NetSuite, Xero, and QuickBooks Online) are updated automatically. No action is required by the user.
